

As a manufacturer, you place high demands on performance.

Sierra Diamond Technology's (SDT) Nano-Di™ Milling Burrs increase tool life and run times. Nano diamond coating improves production, decreases down time and increases your profits.

Zirconia dental restorations utilize multi-axis CNC equipment which demands optimum tooling performance. Improved efficiencies lead to bottom line profitability.

Nano-Di™ Milling Burrs are the perfect solution.
Contact us today!

- > *Tool holds edge longer for more defined margins*
- > *Lower coefficient of friction*
- > *More desirable surface finish*
- > *Less down time*
- > *Increased profits*
